The Fraser River Discovery Centre is hosting an educational day on the Fraser River white sturgeon to help bring awareness to this very unique and endangered species of fish. The event will explore initiatives in white sturgeon education, such as a new school program provided by the Fraser River Discovery Centre and the launch of lessons plans for elementary teachers in eleven school districts by the Fraser River Sturgeon Conservation Society (FRSCS). Keynote speaker, Troy Nelson, Executive Director of the FRSCS, will be providing a special presentation on the latest developments in sturgeon conservation. Included in the festivities will be educational activities, games, and crafts for the whole family to enjoy. Please join us for this interactive day of discovery on the amazing, prehistoric white sturgeon!
